DEGRASSOL PE-C

Conc. Degreasing agent

DESCRIPTION

Degrassol PE-C is a highly concentrated, solvent-free and biodegradable degreasing agent. It is applied for degreasing of pickled sheep skins and for especially raw material with a high fat content.

Degrassol PE-C is alkylphenol and nonylphenol free and formulated as per REACH standards.

TECHNICAL SPECIFICATIONS

Appearance : Clear viscous gel

Active content : 80 %

Charge : Nonionic

pH(1:10 solution) : 7 ± 0.5

Packing : 180 kg plastic drums

APPLICATIONS

Degrassol PE-C as a highly concentrated degreasing agent, should be dissolved with water in required proportion to obtain the needed active content and clear viscous liquid.

The necessary quantity of **Degrassol PE-C** depends on raw material and process steps. The usual dosage for cattle hides is 0.05 – 0.3 %. For degreasing of pickled sheep skins the quantities to be used will vary, depending upon the type and origin of the skins and their natural grease content. Up to 2 % in the de-pickling float followed by additions of 0.1 – 0.5 % in the subsequent washing process will normally afford good results.
